WEBSITE DESIGN PROPOSAL 1 | KNEAD YOU BAKERY (FINAL)

1. ORGANISATION OVERVIEW

1.1 NAME

Knead You Bakery

1.2 ORGANISATION HISTORY

KNEAD YOU (KY) is a contemporary, neighbourhood-focused bakery that unites people with a passion for baking and tasty treats. It was founded in 2022. Its humorous name, which blends the words "knead" and "need you," reflects the idea that food can encourage connections, memories, and a feeling of community. KY encourages people to savour freshly baked goods and experience the joy of baking themselves by fusing classic tastes with modern presentation, inventive recipes, and a straightforward, clean aesthetic.

1.3 MISSION AND VISION

The mission of KNEAD YOU is to unite people with accessible digital content, distinctive baking experiences, classes, recipes, and locally baked products. By fostering creativity, leisure, connection, and individuality while creating a warm, community-driven baking environment, the brand hopes to make baking accessible and rewarding for people of all skill levels. The goal of KNEAD YOU is to establish itself as a reputable and well-known neighbourhood bakery that encourages people to bake, interact, and use food to create unforgettable memories. The brand combines high-quality products with a lively, amicable outlook and an active online and offline community to cater to younger foodies while also being welcoming to families and baking aficionados.

1.4 DETAILED TARGET AUDIENCE

2. WEBSITE GOALS AND OBJECTIVES

2.1 WEBSITE GOALS AND OBJECTIVES

- ★ Increase Brand Awareness → Describe KY's socially conscious identity, principles, persona, and goods.
- ★ Showcase Products → Showcase baked products with eye-catching photos and descriptions.
- ★ Generate Orders & Enquiries → Make it simple for clients to submit requests, ask enquiries, and opt for customised baked goods.
- ★ Promote Workshops → Use registration details to promote baking workshops and social baking activities.
- ★ Provide Useful Information → Provide recipes, baking suggestions, offerings, place of business, hours of operation, and contact details.
- ★ Build Community → Customers ought to be encouraged to interact via social media, gatherings, and baking initiatives.
- ★ Increase Engagement → Urge users to explore, get in touch with the bakery, sign up for updates, and visit the website again.

2.3 KEY PERFORMANCE INDICATORS (KPIs)

KPI	What It Measures
Website Traffic & Page Views	The quantity of people who visit and see key pages, such as the catalogue and product offerings (Matomo, 2024).
Enquiries & Orders	The number of requests, enquiries for specialty cakes, and client questions (Matomo, 2024).
Workshop Registrations	The number of clients enrolling in scheduled activities and baking sessions (Matomo, 2024).
Conversion Rate	The percentage of users who finish tasks like making a request, submitting an inquiry, or scheduling a class (Matomo, 2024).
Customer Engagement	Submissions of contact forms, social media exchanges, and web browsing duration (Matomo, 2024).
Returning Visitors & Bounce Rate	Evaluates users that go without engaging with the website in addition to returning users (Matomo, 2024).

3. CURRENT WEBSITE ANALYSIS

The bakery has a basic online identity on the current KY website, but there are a few things that could be done differently to make it more user-friendly, upscale, and appealing.

3.1 STRENGTHS AND WEAKNESSES

Strengths

- ★ Unambiguous brand recognition
- ★ Details about the product
- ★ Simple to use
- ★ Content for baking
- ★ Contact details

Weaknesses

- ★ Minimal visual appeal
- ★ Simple presentation of the product
- ★ Insufficient interaction
- ★ Uncertain inquiry procedure
- ★ Poor mobile

3.2 MAIN AREAS FOR IMPROVEMENT

1. Develop a uniform colour scheme, font, iconography, and overall brand approach to enhance visual design (HostAfrica, 2026).
2. Make the website easier to navigate by dividing it into five distinct sections: Home, About Us, Products, Enquiries/FAQ, and Contact (HostAfrica, 2026).
3. Enhance the way products are presented by using clear inquiry/order buttons, high-quality photos, specifications, categories, and pricing (HostAfrica, 2026).
4. Boost consumer engagement with more effective calls to action, booking choices, FAQs, and enquiry forms (HostAfrica, 2026).
5. Make the website user-friendly and responsive so that it functions well on mobile, desktop, and tablet (HostAfrica, 2026).

4. PROPOSED WEBSITE FEATURES AND FUNCTIONALITY

Feature	Functionality – 3 Strong Points
Home	1. Logo, slogan, hero picture, bakery introduction and highlighted goods. 2. Clear CTAs and fast links 3. Uses the Book a Class/Enquire feature to provide class descriptions.
About Us	1. Brand story: Describes Ky. name, vision, mission, and history. 2. Brand identity: Emphasises principles like quality, community, and innovation. 3. Visual storytelling: Shows the brand's strategy using pictures of bakery and the baking cycle.
Products	1. Product browsing: Sorts goods into categories including cookies, breads, cupcakes, and bento cakes. 2. Offers pictures, descriptions, costs, and pertinent information about ingredients and allergens. 3. Has buttons for "Enquire Now" and instructions that are easy for beginners to follow.
Enquiries / FAQ	1. Requests and workshops are all covered in the FAQ accordion. 2. Gathers information about the consumer, the type of inquiry, the chosen date, the product or service, and the needs. 3. Provides a clear Submit Enquiry button that enables clients to make direct queries.
Contact	1. Offers a phone number, a valid email address, and contact method. 2. Has an interactive map, a real location, and business hours. 3. Clear CTAs: Get in Touch and hyperlinks.

5. DESIGN AND USER EXPERIENCE

The idea behind KNEAD YOU's design is to create a visual identity that feels cosy, friendly, contemporary, light-hearted, and related to the baking experience. The bakery's emphasis on community, creativity, and quality is communicated using soft hues, contrasted text, and an organic hand-drawn logo.

5.1 PROPOSED COLOUR PALETTE JUSTIFICATION

To create a brand that seems both fun and refined while representing the cosiness of a bakery, the palette strikes a balance between softer pastel hues and deeper brown tones.

1. Warmth, sweetness, and freshly baked foods are represented by **Vanilla Custard #FEEFB6**. It produces a cheerful and welcoming atmosphere (Coolors, 2026).
2. **Pale Sky #C3DAE8** keeps the design from seeming too warm while bringing a calm and revitalising element to the colour scheme (Coolors, 2026).
3. Dessert enthusiasts and younger demographics will like **Petal Frost #FAD6E1**'s gentle, light-hearted, and playful aspect (Coolors, 2026).
4. The website remains clean and simple thanks to **Soft Linen #EFEADC**'s neutral, organic background shade (Coolors, 2026).
5. **Deep Mocha #432F2E** has a strong connection to coffee, chocolate, and baked products while adding refinement and depth (Coolors, 2026).
6. **Dark Coffee #362009** improves legibility by offering high contrast for crucial text, headers, and navigation (Coolors, 2026).

5.2 TYPOGRAPHY JUSTIFICATION

The primary sans-serif font of the typography is Raleway, while the complementing serif font is EB Garamond (Google font, 2026). The KNEAD YOU concept of fusing classic baking with a new approach is demonstrated by the difference between the classic EB Garamond and the contemporary Raleway.

1. Raleway is utilised for buttons, headers, navigation, and other crucial information (Google font, 2026). The website is easy to read and provides the business a current vibe due to its modern design.
2. EB Garamond is utilised for ornamental headers, quotes, and accompanying text (Google font, 2026). Warmth, history, and a handmade quality related to classic baking are added by its exquisite serif design.

Aa

Raleway designed by Matt McInerney, Pablo Impallari, Rodrigo Fuenzalida (Google font, 2026).

Aa

EB Garamond designed by Georg Duffner, Octavio Pardo (Google font, 2026).

5.3 LOGO STYLE JUSTIFICATION

Instead of a very formal or corporate design, the logo possibilities are hand-drawn in an organic approach. As a result, the brand comes out as approachable, amiable, and intimate. The dough-like illustration clearly conveys the bakery's mission, while the lettering's rounded edges and imperfections also allude to a handcrafted, homemade atmosphere, supporting the bakery's emphasis on cosiness and community.

Additionally, the logo may be modified into other variations, like:

1. Complete logo → dough icon + KNEAD YOU wordmark
2. For website headers, using Wordmark → "Knead You."
3. Icon → bread graphic to be used on profiles and social media
4. Short logo → "KY" for favicons and other minor applications

5.5 WIREFRAME LAYOUT AND DESIGN CONSIDERATIONS

A. STRUCTURE & NAVIGATION STRATEGY

The website wireframe uses a top navigation bar that is consistent across all pages to create a clear structural base. This design decision, which places the brand name next to direct links to important areas, guarantees users can easily navigate the website and keep constant visual orientation. A standard footer that anchors each page with key taglines, social media connections, and physical address information complements the navigation bar. This ensures that crucial contact and operational information is always available, no matter where a visitor comes on the website, while also creating great visual coherence across the user journey (Figma, 2026).

B. PAGE-SPECIFIC DESIGN RATIONALE

High-impact hero taglines and a visible "BOOK A CLASS" call-to-action, along with organised product preview cards that promote rapid browsing without overcrowding the screen, help the homepage create an instantaneous brand identity. To foster emotional connection and trust, the About Page switches to a narrative format that breaks down "OUR STORY" with emphasised ideals. Product evaluation and conversion pathways are streamlined on the Product Page via a structured grid with clear "ENQUIRE NOW" buttons and a category filter bar. By combining an expanding FAQ section with a drop-down form to effectively organise user enquiries, the Enquire Page lowers pre-request friction. Lastly, the Contact Page places a high priority on scannability by organising operating facts like store hours and physical address under distinct headings so that visiting details are easily identified (Figma, 2026).

C. BRAND VOICE & TYPOGRAPHY

The website's typography and language are thoughtfully used to provide a personable, personality-driven user experience. Playful, bakery-themed jargon is used in slogans like "WHAT DO YOU KNEAD TO KNOW?" and "LET'S KEEP THE CONVERSATION BAKING!" right alongside useful user interface elements. By adding cosiness and charm to common interface elements like forms and headers, this design decision strengthens the bakery's welcoming brand character and makes user interactions enjoyable and memorable (Figma, 2026).

Homepage

About Page

Product Page

Enquiry Page

Contact Page

6. TECHNICAL REQUIREMENTS

Requirement	Proposed Technology/Requirement
Domain	www.kneadyou.co.za Since KY is a South African bakery and the domain helps identify the company as a South African entity, the.co.za domain is appropriate (Afrihost, 2026).
Hosting	Afrihost Linux shared web hosting (Afrihost, 2026).
Structure	HTML5
Styling	CSS3
Interactivity	JavaScript
Responsive Design	CSS Media Queries / Bootstrap might be utilised to help with responsive layouts and guarantee that the website functions properly on desktop, tablet, and mobile platforms (Bootstrap, 2026).
Database	No database used for this website
Security	SSL certification and secure HTTPS
Forms	HTML, CSS and JavaScript
Compatibility	Desktop, tablet and mobile
Maintenance	Regular backups and updates

7. TIMELINE AND MILESTONES

Date / Period	Phase	Milestone
03–05 August 2026	Planning & Foundation	Planning & Foundation completed
06–08 August 2026	Research & Content Gathering	Research and content completed
10–14 August 2026	HTML Structure	⊕ Part 1 Submission – 14 August
21 August–25 August 2026	CSS & Visual Design	Visual design completed

26 August–03 September 2026	Responsive Design	Responsive design completed
05–12 September 2026	JavaScript & Functionality	Functionality completed
15–17 September 2026	SEO, Integration & Testing	Final testing completed
18 September 2026	Parts 2 & 3 Submission	⊕ Part 2 & Part 3 Submission – 18 September

8. BUDGET ESTIMATION

Item	Estimated Cost	Frequency	Purpose
Website development	R6,000	Once-off	HTML, CSS, JavaScript, page development, responsive design and functionality
Afrihost Domain (.co.za)	R0 first year	Annual	Domain included with eligible Afrihost hosting
Domain renewal	R99	Annual	Renewal after the first year
Afrihost Linux Gold Hosting	R94	Monthly	Website hosting, email accounts and database
Website maintenance	R500	Monthly	Updates, content changes, testing, backups and minor fixes
Content/images	R500	Once-off	Product photography, graphics or stock images if required
Estimated initial cost	±R6,500	Once-off	Development + initial content costs
Estimated monthly running cost	±R594	Monthly	Hosting + maintenance
Estimated first-year cost	±R13,628	Annual	Development + 12 months hosting/maintenance + content

The budget ought to be modest while still offering dependable hosting and a polished web presence because KY is a small, local bakery. Because Afrihost is a South African hosting company with reasonably priced shared-hosting packages, I would opt for it for hosting (Afrihost, 2026).

8.1 DEVELOPMENT COST

I would estimate a one-time development cost of about R6,000 for the development of the Knead You website. HTML, CSS, JavaScript, responsive design, basic SEO, form functionality, testing, and final deployment would all be covered in the development fee. The planning and development of the five primary sections would fall under this category.

8.2 HOSTING COST

For about R94 a month, I would choose Afrihost Gold Linux Shared Hosting. Since the website is basic and doesn't initially need a dedicated server, this is appropriate for Ky. One MySQL database, 75 email addresses, and 3 GB of storage are included with the bundle (Afrihost, 2026).

∴ Annual hosting cost: $R94 \times 12 = R1,128$ per year

8.3 DOMAIN COST

The proposed domain would be: www.kneadyou.co.za

The cost of registering a .co.za name is presently listed by Afrihost at R197; however, the domain registration is free for the initial year when used with qualified shared-hosting packages (Afrihost, 2026). Right now, the stated annual renewal cost is R99.

∴ First year = R0 | Following years: ±R99/year

8.4 MONTHLY MAINTENANCE

For website upkeep, I am willing to bill about R500 a month.

∴ R94 hosting + R500 maintenance = R594 per month

This would include:

1. Reviving product details
2. Introducing novel products
3. Including additional classes
4. Changing FAQs
5. Examining the inquiry forms
6. Resolving small website problems
7. Updating content and images
8. Investigating links
9. Simple website upkeep and backups

WEBSITE DESIGN PROPOSAL 2 | EVE'S GARDEN FLOWER SHOP

1. ORGANISATION OVERVIEW

1.1 NAME

Eve's Garden

1.2 ORGANISATION HISTORY

In 2024, Eve's Garden was founded as a floral arrangement company focused on Ikebana, a traditional art form. Eve's Garden integrates Ikebana principles into its arrangements, in contrast to a traditional flower shop that specializes in bouquet sales. Ikebana emphasizes intentional arrangement, natural forms, space, balance, and simplicity. This gives Eve's Garden a unique personality and enables the company to blend artistic expression with flower design. The company doesn't currently have a physical location or a well-established internet presence. As a result, the planned website will function as a crucial digital platform for presenting the company, showcasing its arrangements, and interacting with prospective clients.

1.3 MISSION & VISION

Eve's Garden offers unconventional, reasonably priced, and incredibly customizable floral arrangements to promote flowers as a means of interpersonal communication. By letting clients choose arrangements according to their feelings, events, tastes, and financial constraints, the company aims to make flower gifts more customized.

The goal is to make Eve's Garden a well-known flower brand that offers exquisite floral arrangements to a larger audience while fusing Ikebana, creativity, and emotional expression. Therefore, the website should convey that Eve's Garden does more than just sell flowers; it also uses flowers to help clients express their feelings and have meaningful experiences.

1.4 TARGET AUDIENCE

Primary audiences

1. Gift buyers searching for sentimental and unique presents.
2. Floral arrangements are necessary for celebrations and events hosted by event hosts.
3. Clients who value esthetics and are drawn to simple, eye-catching designs.
4. Japanese flower art aficionados who love Ikebana.
5. DIY enthusiasts who wish to learn how to make their own arrangements.
6. Consumers on a tight budget searching for less expensive flower arrangements.

2. WEBSITE GOALS AND OBJECTIVES

2.1 GOALS

The website will serve as Eve's Garden's digital portfolio and platform for consumer interaction. It will convey the company's brand concept, educate guests to Ikebana and its values, display configurable floral arrangements, and offer DIY guides and information on flower maintenance. Additionally, the website will facilitate requests for event arrangements, promote client enquiries, and build the organization's online visibility.

2.1 KEY PERFORMANCE INDICATORS (KPIs)

- How-To Guide Views/Downloads: Indicates interest in learning materials.
- Product Catalogue Engagement: Monitors how people engage with flower arrangements.
- Custom Arrangement Enquiries: Indicates a desire for individualized services.
- Contact-Form Submissions: Monitors queries and conversions from customers.
- FAQ Interactions: Lists frequently asked questions and issues from customers.
- Product Page Time: Shows how interested a consumer is in a product.
- Mobile Engagement: Evaluates the usability and performance of websites on mobile devices.
- Call-to-Action Clicks: Monitors whether users are urged to submit requests or questions.

3. CURRENT WEBSITE ANALYSIS

3.1 STRENGTHS

- Unique brand idea because of its association with Ikebana.
- Strong visual potential due to the superior visual content that flowers naturally provide.
- Gift buyers, event planners, and esthetically oriented consumers make up the clear target market.
- Possibility for customization, enabling the business to set itself apart from traditional florists.
- Educational value by information on flower care and Ikebana techniques.

3.2 WEAKNESSES

- Little awareness of digital brands.
- It's possible that customers don't know what Ikebana is.
- No well-established web catalog.
- Restricted details on cost and customization.
- No expedited procedure for bespoke orders.

- Absence of instructional materials.
- Mobile users may have restricted access.

3.3 KEY IMPROVEMENTS

- Building a visually appealing webpage.
- Elucidating the idea of Ikebana.
- Supplying a well-organized product catalog.
- Introducing the ability to place bespoke orders.
- Developing day teaching materials and floral care.
- Offering choices for contact and inquiry.
- Enhancing responsiveness on mobile devices.
- Making powerful appeals to action.

4. PROPOSED WEBSITE FEATURES AND FUNCTIONALITY

4.1 HOMEPAGE

- Describe the natural, creative, and simple character of Eve's Garden.
- Use the heading "Let Flowers Say What Words Cannot" with an iconic Ikebana picture.
- Display highlighted arrangements, Ikebana details, and do-it-yourself guides.
- Add social network connections, a personalised inquiry call to action, and "Find Your Flower Message."

4.2 ABOUT US

- Describe Eve's Garden's founding and history in 2024.
- Describe how it relates to balance, simplicity, mindfulness, and Ikebana.
- Emphasize the company's approach to customised and reasonably priced flower design.
- Explain flower selections, colours, ideas, and feelings using "The Art Behind the Arrangement."

4.3 PRODUCTS & HOW-TO GUIDE

- Display layouts according to mood, colour, budget, occasion, and style.
- Make it easy to find products by offering filters.
- Incorporate seasonal recommendations, flower care advice, and Ikebana techniques.
- "Ikebana in 5 Minutes" has the following steps: Select → Arrange → Balance → Display → Trim.

4.4 ENQUIRIES & FAQ

- Offer a guided custom-enquiry form for events and flower arrangements.
- Gather important information about the event, date, budget, colours, and chosen style.
- Add frequently asked questions about ordering, personalization, costs, shipping, flower maintenance, and availability.
- Assist in cutting down on recurring enquiries and boosting client confidence prior to inquiry.

4.5 CONTACT DETAILS

- Clearly include your location, phone number, email address, and business hours.
- Incorporate social media platform linkages.
- To facilitate consumer communication, include a contact/inquiry form.
- Make the "Enquire Now" button easily accessible by placing it prominently across the website.

5. DESIGN AND USER EXPERIENCE

5.1 COLOUR SCHEME JUSTIFICATION

Black Cherry | #560002

The main dark color in the website's palette will be black cherry. Its rich crimson hue maintains a strong link to flowers while evoking a feeling of sophistication, elegance, and luxury. It creates a striking contrast with the lighter colors and may be utilized for headlines, navigational elements, and significant accents (Coolors, 2026).

Burnt Rose | #94404B

The color scheme gains warmth and emotional depth from the addition of burned rose. Its subdued reddish-pink hue symbolizes love, romanticism, and the organic hues of flowers. It may be used to buttons, secondary headers, and ornamental elements to soften the contrast between brighter colors and the deeper Black Cherry (Coolors, 2026).

Olive | #95802C

The natural and floral elements of Eve's Garden are symbolized by the olive. While counterbalancing the warmer reds and pinks, its earthy tone links the website to flora, growth, and the garden theme. Icons, buttons, ornamental elements, and other minute visual features can all use it (Coolors, 2026).

Powder Blue | #ABBFD5

Powder Blue gives the color scheme a serene and revitalizing touch. Its calm, gentle tone fosters harmony and serenity, which enhances Ikebana's creative and contemplative aspects. It may be applied to backdrops, cards, and bigger areas when a more delicate visual style is needed (Coolors, 2026).

Baby Pink | #FDA8C1

Baby Pink adds softness, warmth and a contemporary floral quality to the website. The colour represents affection and delicacy while creating a visual connection to flowers. It can be used as an accent colour for highlights, interactive elements and decorative details without overwhelming the overall design (Coolors, 2026).

5.2 TYPOGRAPHY JUSTIFICATION

Aa

1. Main Headings | Copse, designed by Dan Rhatigan

The primary headers of the Eve's Garden website will be written in Copse (Google Font, 2026). The flower brand's natural and beautiful character is complemented by its subtle organic look and gentle serif elements. Large headers, page titles, and bold declarations may all benefit from the font's beautiful but approachable style. Its unique look contributes to the creation of a recognizable visual identity that links to Ikebana's creative and historic influences.

Aa

2. Body text | Libre Franklin designed by Impallari Type

Forms, product descriptions, navigation, and other functional language will all be written in Libre Franklin (Google Font, 2026). Longer passages of text are easy to read thanks to its simple sans-serif structure, which also creates a great contrast with Copse. Libre Franklin's contemporary design also keeps the website from becoming unduly conventional, striking a balance between Ikebana's artistic attributes and a cutting-edge digital experience.

Ala

3. Small decorative accents | Homemade Apple designed by Font Diner

Throughout the website, Homemade Apple will be used seldom as a decorative accent typeface. Its handwritten appearance provides a unique, organic, and handcrafted aspect that goes well with Eve's Garden's emphasis on artistic expression and custom floral arrangements. It adds individuality without sacrificing the legibility of the primary material and may be used for brief sentences, tiny labels, quotations, or ornamental messages (Google Font, 2026).

5.3 LOW-FIDELITY WIREFRAMES

6. TECHNICAL REQUIREMENTS

To make the website available online, Eve's Garden will need dependable web hosting. With a hosting package that provides a free.co.za domain and SSL certificate, HOSTAFRICA is suggested as the hosting provider. An SSL certificate helps ensure a safe connection between the website and its users, and the.co.za domain is appropriate for creating a South African online identity (HostAfrica, 2026).

JavaScript, HTML5, and CSS3 will be the main tools used in the development of the website. The website's structure and content will be provided by HTML5, the responsive layout and visual design will be managed by CSS3, and interactive elements like product filtering, form validation, and FAQ functionality will be handled by JavaScript (Molliza, 2019). A significant development framework is not necessary for this project. The website will remain lightweight and manageable while yet enabling the implementation of the necessary functionality if basic HTML, CSS, and JavaScript are used. Additionally, the website should adhere to responsive design standards so that users may efficiently access the arrangements, tutorials, and inquiry forms on desktop, tablet, and mobile platforms (Molliza, 2019).

7. TIMELINE AND MILESTONES

04–06 August 2026 | Planning

- ★ Milestone: Planning and project foundation completed.

07–11 August 2026 | Research

- ★ Milestone: Research completed.

12–14 August 2026 | HTML Structure & Part 1

- ★ Milestone: Part 1 Submission.

19–24 August 2026 | CSS & Visual Design

- ★ Milestone: Visual design and styling processing.

25–31 August 2026 | Responsive Design

- ★ Milestone: Responsive design processing.

04–11 September 2026 | JavaScript

- ★ Milestone: Website functionality processing.

14–17 September 2026 | SEO, Integration & Testing

- ★ Milestone: Final testing and integration processing.

18 September 2026 | Parts 2 & 3 Submission

- ★ Milestone: Part 2 & Part 3 Submission.

8. BUDGET ESTIMATE

For the first year, the Eve's Garden website is expected to cost between R15,080 to R28,440 for development, hosting, domain/SSL, and continuing maintenance. This allows you frequent upgrades and technical assistance while offering a reasonable budget for building a polished, responsive website.

Category	Estimated Cost
Development	R8,000–R15,000
Hosting	R1,080–R1,440/year
Domain & SSL	Included with hosting*
Maintenance	R6,000–R12,000/year
Estimated First-Year Total	R15,080–R28,440

***In accordance with the suggested HOSTAFRICA hosting strategy.**
